Summary

- Passionate Android Developer with Intern Experience.
- Comfortable in developing Android App in Kotlin following MVVM architecture.
- Graduated from Android Developer Nanodegree by Udacity.

Experience

Android Developer Intern

Trellos

Dec 2020 - Jan 2021 (2 months)

Developed a Custom Survey Android App from scratch in Kotlin for Safai Karmchari Andolan, an NGO by Bezwada Wilson.

Application uses Firebase Authentication while Firebase Realtime Database was used to store the data on cloud, with a feature for Admin to download the complete data from server directly in their device in CSV form.

Education

SJB Institute of Technology

Bachelor of Engineering - BE, Computer Science

2018 - 2022

Udacity

Android Developer Nanodegree, Computer Science

2020 - 2020

Project

Entertainment App

An android app that fetches various list of movie data from TMDBApi using the Retrofit library and displays it in the application. App uses Glide and BigImageViewer libraries to display posters and make them zoomable.

Users can add the movies to their playlists which are stored locally using the ROOM library.

The app is fully developed in Kotlin using Coroutines and following MVVM architecture.

Skills

- Android • Android Development • Kotlin • Java • Model-View-ViewModel (MVVM)
- Room Database • Firebase
