## Experience

### Android Developer Intern

Trelor

Dec 2020 - Jan 2021 (2 months)

Developed a Custom Survey Android App from scratch in Kotlin for Safai Karmchari Andolan, a movement by Mr. Bezwada Wilson.

Application uses Firebase Authentication while Firebase Realtime Database was used to store the data on cloud, with a feature for Admin to download the complete data from server directly in their device in CSV form.

## Education

### SJB Institute of Technology

Bachelor of Engineering - BE, Computer Science

2018 - 2022

### Udacity

Android Developer Nanodegree, Computer Science

2020 - 2020

## Project

### [Entertainment App](#)

- Published on PlayStore.
- Technologies : Android, Kotlin, TMDBApi, Android Jeptack.
- Movie Guide and recommendation app based on MVVM design pattern.
- App uses Room Library to create and store movies wishlists in local storage.

## Skills

- Android • Android Development • Kotlin • Java • Model-View-ViewModel (MVVM)
- Room Database • Firebase • Room Database
